Look forward to seeing you!!!

Course Description & Learning Objectives:

Come experience RNR therapy, a dynamic system that will change your life!!! This course is 88 percent “hands-on”. RNR therapy is easy to duplicate. This makes the routines fun and easy with profound results and is designed to create transformations with clients and yourself that have potentially long-lasting results in one session. The course is designed so that you have plenty of time to practice.

First, you will see a demonstration of the strokes being used for each routine. Each participant will experience from the instructor and/or the teaching assistant those strokes and then have time to practice with other participants what was just demonstrated.

After practicing the individual strokes, you will see a demonstration of a complete routine for a given section. Since you will be able to identify the strokes being used, you will then duplicate that routine with step-by-step instructions. Both the instructor and teaching assistant are available to assist each participant during practice.

With these quick, efficient, and easy additional routines, the goal is to have fun while utilizing new concepts that may be used immediately upon returning home with the same results as the instructor or teaching assistant.

In this course, participants will recognize when RNR therapy is appropriate and how the RNR therapy systems assist in reconnecting the neurotendinous organs. Because RNR therapy is so versatile, it blends well with other modalities potentially increasing the total effectiveness of a given treatment and is perfect for “targeted” treatments.

What to Bring:

A table is more preferable than using the floor or by putting chairs together; however, whichever you choose, please bring: 3 flat sheets (twin preferable), 1 fitted sheet, 1 pillow with case, 1 towel (24/30" x 30/48"), roll of paper towels for faces, hand sanitizer.
